sanicro

L'INNOVAZIONE
NON HA CONFINI.
E' UN VIAGGIO.
VERSO
NUOVI MONDI.

THE INNOVATION HAS NO BORDERS.
IT'S A JOURNEY TO NEW WORLDS.

L'INNOVATION N'A PAS DE FRONTIERES.
C'EST UN VOYAGE VERS DE NOUVEAUX MONDES.

LA STORIA DI UNA VITA dal 1914

SANICRO TIENE TUTTO IL BUONO DEL PASSATO PER CURARE IL PRESENTE E SOGNARE IL FUTURO.

CURA – QUALITÀ – PROGETTAZIONE – INNOVAZIONE – DESIGN

Sanicro è la storia di un'azienda.

E' la storia di una vita. E' la storia di una famiglia che ancora affonda i suoi valori nei rapporti umani.

Sanicro disegna, produce, vende docce di alta qualità. Esprime la cura dei legami più speciali, l'attenzione per i suoi clienti, in Italia e all'estero. Garantisce l'accoglimento delle singole esigenze, interpreta i bisogni e funge da intermediario per i mercati esteri. Offre servizi personalizzati, tra i quali il consignment stock.

Investe nella progettazione di prodotti funzionali e innovativi, altamente certificati, ma dal design italiano, raffinato ed elegante. Coniuga stile ed efficienza.

Coglie le esigenze moderne e studia un nuovo concetto di doccia, a basso impatto ambientale ed ecologico,

perché la cura di se stessi passa anche attraverso l'attenzione agli altri e alla natura.

Ecco perché ti puoi fidare: Sanicro tiene tutto il buono del passato e sceglie anche di innovare, creare, evolvere.

Inventa una doccia per ogni necessità.

Sanicro sa che il mondo, il tuo mondo, ha bisogno di cure.

I SERVIZI

PRODUZIONE E DISTRIBUZIONE PER CLIENTI ITALIANI ED ESTERI, IN TUTTO IL MONDO

IDEAZIONE, CO-DESIGN, PROTOTIPAZIONE E PRODUZIONE.

Attraverso la collaborazione con Flowservice, Sanicro propone al cliente e co-disegna in sinergia con lui, un prodotto che risponda alle sue esigenze. E' possibile poi, a partire dall'idea, realizzare soluzioni diversificate,

come la rappresentazione 3D del prototipo funzionante o la stampa di una preserie. Attraverso software innovativi,

che monitorizzano e riducono i difetti di produzione, è anche possibile progettare stampi altamente efficienti,

che consentano un notevole risparmio di risorse, in termini di denaro ed energie.

Sanicro accompagna il cliente dall'idea al prodotto finito.

INTERMEDIAZIONE

Sanicro ha fornitori e clienti in tutto il mondo. Attraverso questa fitta rete di legami può fungere da intermediario tra cliente e fornitore estero, per garantire transazioni facili e rapide, con partner affidabili e testati.

CONSIGNMENT STOCK

Sanicro può gestire e rifornire i magazzini dei clienti, con stoccaggio e consegna ai singoli punti vendita in Italia e in Europa.

I PUNTI DI FORZA.

L'azienda Sanicro si sviluppa in 6.500 metri quadrati dei quali 2.500 destinati all'attività produttiva e 4.000 ad uso magazzino.

Affidabilità. Sanicro è la storia di una vita.

Innovazione tecnologica, progettuale, ingegneristica.

Flessibilità e velocità progettuali, produttive e commerciali.

Adattabilità alle specifiche esigenze e alle richieste del cliente.

Consulenza globale. Sanicro accompagna il cliente e risponde alle sue necessità, in tutte le fasi della filiera produttiva e di distribuzione.

EN

since 1914

SANICRO TAKES ALL THE GOOD OF THE PAST.

To heal the present and dream the future.

Care - Quality - Development - Innovation - Design

Sanicro is the story of a Company. It's the story of a life.

The story of a family that still bases its values on human relationships. Sanicro designs, manufactures, sells high quality handshowers. It shows the care of the most special ties, the attention for its Customers, in Italy and abroad. It guarantees the acceptance of the individual needs, answers to the needs and acts as an intermediary for foreign markets.

It provides personalized services, including the consignment stock. It invests in the development of functional and innovative products highly certificated, but with a sophisticated and elegant Italian design. It combines style and efficiency.

It feels the modern requirements and studies a new concept of shower, at low environmental and ecological impact, because the care of ourselves passes also through the attention to others and to the nature.

That's why you can trust: Sanicro takes all the good of the past and also chooses to innovate, create, evolve.

Sanicro designs a shower for every need.

Sanicro knows that the world, your world, needs cares.

SERVICES.

Production and distribution for Italian and foreign customers, all over the world

CONCEIVING, CO-DESIGN, PROTOTYPING AND PRODUCTION.

Through the collaboration with Flowservice, Sanicro offers and co-designs to its customers a product that meets customers' needs. Then, starting from the idea, some different solutions will be submitted, such as 3D representation of the working prototype or a pre-series. Through innovative software that monitor and reduce manufacturing defects, it is also possible to design highly efficient moulds, allowing a considerable saving of resources, in terms of money and energy.

Sanicro accompanies the customer from the concept to finished product.

MEDIATION.

Sanicro has suppliers and customers all over the world.

Through this network of bonds can act as an intermediary between customer and abroad supplier, to ensure quick and easy transactions, with reliable and tested partners under a high quality supervision and control.

CONSIGNMENT STOCK.

Sanicro can manage and supply the customers' warehouses, with storage and delivery to individual stores in Italy and Europe.

STRONG POINTS

The Sanicro's facilities is composed of 6.500 square meters, 2.500 for production and 4.000 for warehouse use.

Reliability. Sanicro is the story of a life.

Technological, design and engineering INNOVATION

Flexibility and speed production and sales.

Adaptable to specific needs of executive customer requirements.

Global consulting. Sanicro accompanies the customers and

answers to their needs, at all stages of the production and

distribution.

FR

depuis 1914

SANICRO CONSERVE TOUT LE BIEN DU PASSÉ.

Pour guérir le présent et rêver l'avenir.

Soins - Qualité - Conception - Innovation - Design

Sanicro est l'histoire d'une société. C'est l'histoire d'une vie.

C'est l'histoire d'une famille qui enfonce toujours ses valeurs dans les relations humaines.

Sanicro dessine, fabrique, vend douchettes de haute qualité.

Exprime la prise en charge des liens les plus particulière, l'attention pour ses clients, en Italie et à l'étranger. Garantit l'acceptation des besoins individuels, répond aux besoins et agit comme un intermédiaire pour les marchés étrangers.

Offre des services personnalisés, y compris le stock en consignment. Investit dans la conception des produits fonctionnels et innovants, hautement certifié, mais avec le design italien, raffiné et élégant. Il allie style et efficacité. Capture les exigences modernes et étudie un nouveau concept de douche, à faible impact environnemental et écologique, car le soin d'eux implique également attention aux autres et à la nature.

C'est pourquoi vous pouvez faire confiance: Sanicro conserve tout le bien du passé et choisit également d'innover, de créer, d'évoluer. Invente une douchette pour chaque besoin.

Sanicro sait que le monde, ton monde, a besoin de soins.

LES SERVICES.

Production et distribution pour les clients italiens et étrangers, partout dans le monde

IDÉATION, CO-DESIGN, PROTOTYPAGE ET PRODUCTION.

Grâce à la collaboration avec Flowservice, Sanicro offre au client et co-dessine en synergie avec lui, un produit qui répond à son besoins. Il est alors possible, à partir de l'idée, mettre en œuvre des solutions différentes, telle que la représentation en 3D du prototype fonctionnel ou la production d'un pre-série. Grâce à des programmes innovants qui permettent de surveiller et de réduire les défauts de fabrication, l'est également possible de concevoir des moules très efficace, qui permet une économie considérable de ressources, en termes d'argent et d'énergie. Sanicro accompagne le client à partir de l'idée jusqu'au produit fini.

INTERMÉDIATION.

Sanicro a des fournisseurs et des clients dans tout le monde.

Grâce à ce réseau de liaisons Sanicro peut agir comme un intermédiaire entre le client et le fournisseur étranger, pour assurer des transactions rapide et facile, avec des partenaires fiables et testés.

STOCK EN CONSIGNATION.

Sanicro peut gérer et réapprovisionner les stocks des clients, avec l'entreposage et la livraison sur chaque magasins, en Italie et en Europe.

POINTS FORTS.

La société Sanicro se développe en 6.500 mètres carrés, 2.500 sont destinées pour les activités de production et 4.000 sont l'entrepôt.

Fiabilité. Sanicro est l'histoire d'une vie.

Innovation technologique, conception, ingénierie.

Flexibilité et vitesse de conception, de production et des ventes.

Adaptabilité aux besoins et aux exigences spécifiques du client.

Conseil global. Sanicro accompagne le client et répond à ses

besoins, à tous les stades de la production et de la distribution.

CARATTERISTICHE TECNICHE

CRISTALPLANT

MANUTENZIONE QUOTIDIANA:

Prendersi cura di CRISTALPLANT® è semplice e veloce. E' sufficiente pulire CRISTALPLANT® con acqua saponata o comuni detersivi per rimuovere la maggior parte delle macchie e dello sporco che si possono depositare sulla superficie. In questo modo verrà mantenuta la finitura opaca originale, caratteristica distintiva del CRISTALPLANT®.

COME PREVENIRE I DANNEGGIAMENTI:

La superficie ha una buona resistenza alle macchie in genere; ciò nonostante si sconsiglia l'utilizzo di prodotti chimici aggressivi quali: acetone, trielina, acidi o basi forti. Alcune sostanze come inchiostro, cosmetici, tinte, a contatto prolungato con il materiale possono rilasciare coloranti sulla superficie di CRISTALPLANT®. Stessa cosa per le sigarette accese. Ma il tutto può essere rimosso seguendo i consigli sotto riportati.

RIMUOVERE MACCHIE OSTINATE, GRAFFI E BRUCIATURE:

CRISTALPLANT® è un materiale omogeneo in tutto il suo spessore, può quindi essere riparato dalle aggressioni superficiali quali graffi, bruciature di sigaretta e macchie ostinate, riportando la superficie alla bellezza originale, semplicemente seguendo queste indicazioni: per piccoli danneggiamenti è possibile ripristinare la superficie adoperando una spugnetta abrasiva e un comune pulitore abrasivo. Levigare superficialmente la parte danneggiata. Se il difetto è ancora visibile ripassare levigando con carta abrasiva molto fine.

UTILIZZARE:

Detersivi in crema o polvere che contengano micro-granuli che abradano la superficie. L'alcool etilico denaturato può essere utilizzato avendo l'accortezza di risciacquare bene la superficie.

NON UTILIZZARE:

Solventi con acetone e trielina e altre sostanze chimiche aggressive come acidi forti (acido muriatico) e basi forti (soda caustica). Detersivi industriali o altri di cui non si conosce l'aggressività: in questo caso è bene fare la prova in una zona non a vista prima di applicarlo su una vasta area. Sostanze molto aggressive per sgorgare i lavelli. Solventi utilizzati nel settore della verniciatura.

TECHNICAL CHARACTERISTICS

CRISTALPLANT

DAILY MAINTENANCE:

Looking after CRISTALPLANT® is quick and easy. Just clean CRISTALPLANT® with soapy water or ordinary detergents to remove most stains and dirt that may be deposited on the surface. It is particularly recommended to use gel or abrasive detergents; taking care to rinse the surface well, this will maintain the original opaque finish, which is a distinctive characteristic of CRISTALPLANT®.

HOW TO PREVENT DAMAGE:

The surface has a good resistance to stains in general however it is recommended not to use aggressive chemicals such as acetone, trichloroethylene, strong acids or bases. Some substances such as ink, cosmetics and dyes if left in prolonged contact with the material may leave stains on the surface of CRISTALPLANT® the same applies to lit cigarettes. However all these stains may be removed by following the instruction below.

REMOVING STUBBORN STAINS, SCRATCHES AND BURNS:

Is homogeneous all the way through, so superficial damage such as scratches, cigarette burn and stubborn stains can be repaired, restoring the original beauty of the surface, simply following these instructions. For slight damage it is possible to repair the surface using an abrasive sponge and ordinary abrasive cleaning agent. Smooth the surface of the damaged part. If the fault is still visible, rub again with very fine sandpaper (grain 360/400).

USE:

Detergents in cream or powder form which contain micro-granules that abrade the surface. Denatured ethyl alcohol may be used: taking care rinse the surface well.

DO NOT USE:

Solvents such as acetone or trichloroethylene and other aggressive chemicals such as strong (hydrochloric acid) and strong bases (caustic soda). Industrial detergents or others of which the aggressive nature is not known: in this case it is advisable to test the product in an unseen area before apply it over a large part. Very aggressive substances far unclogging sinks. Solvents used in the paint sector.

CARACTÉRISTIQUES TECHNIQUES

CRISTALPLANT

ENTRETIEN QUOTIDIEN:

L'entretien du Cristalplant c'est simple et rapide. C'est suffit nettoyer Cristalplant avec de l'eau et du savon ou avec des détergents ordinaires à éliminer la plupart des taches et la saleté qui peut être déposée sur la surface.

Ils sont recommandés dans les détergents en gel ou abrasif, en prenant soin de bien rincer la surface pour maintenir la finition mate originale, caractéristique distinctive du Cristalplant.

COMMENT PRÉVENIR LES DOMMAGES:

La surface a une bonne résistance aux taches en général: mais il ne recommande pas l'utilisation de produits chimiques comme l'acétone, trichloréthylène, les acides et les bases fortes. Certaines substances comme l'encre, les cosmétiques et les colorants, en contact avec le produit peut laisser des taches sur la surface du Cristalplant, même chose pour les cigarettes, mais tout cela peut être retiré en suivant ces conseils.

ENLEVER LES TACHES TENACES, ÉGRATIGNURES ET BRÛLURES:

Cristalplant c'est homogène dans toute son épaisseur et peut donc être réparé par les agressions telles que les rayures, brûlures de cigarettes et les taches tenaces qui reviennent la surface à sa beauté originelle, simplement en suivant ces conseils: pour les petits dommages c'est possible récupérer la surface en utilisant une éponge abrasive et un nettoyant abrasif. Lisser la surface de la partie endommagée. Si le défaut est encore visible, lisser à nouveau avec du papier de verre très fin.

UTILISER:

Détersifs de crème ou de poudre qui contiennent des micro granules qui abrasent la surface. Alcool éthylique dénaturé peut être utilisé, en prenant soin de bien rincer la surface.

NE PAS UTILISER:

Solvants comme l'acétone, le trichloréthylène et autres produits chimiques agressifs tels que les acides forts (acide chlorhydrique) et les bases fortes (soudes caustiques). Détersifs industriels ou autres dont on ne connaît pas l'agression: dans ce cas, vous devez faire le test dans une zone non visible avant de l'appliquer sur une grande surface. Les substances qui sont très agressifs à jaillir des puits. Les solvants utilisés dans le domaine de la peinture.
